bookface

Overview

Route your App!

Add the following pages to your app:

1. **homepage - nice and welcoming homepage to your app.**
2. **about - a page about yourself and the application (nice picture and few lines about you and about the application for example framework you used to build the app.).**
3. **book - what you did yesterday (the books-i-read).**
   a. **Shows search box and allow the user to pick and provude feedback for the book**

  b. **Remove the part showing the books I already read and put it in another page**

4. **book-feedback**

  a. **List of feedback with option to delete a feedback**

  b. **And link to a specific feedback**

5. **book-feedback/bookid- BookFeedback**

  a. **Get fresh data from the API (need to issue an AJAX call like [this])**

  b. **Show also the price and a button to purchase the book (if exists)**

- **All the pages should contain a navbar with links to the other pages.**
- **Use [sweetalert] to show success messages for user actions**
- **Use vue router to navigate between pages.**

Goals

1. **Learn how to use the vue router to navigate between pages.**

2. **Learn how read parameters from the url with the vue router.**

3. **Stay in school**
